Subject: Updated (as of March 8, 2016) Monitoring Schedule for the Polacca Water system
Attachments: 2016 03 08-Monitoring Schedule-090400106.pdf

Attached is the updated (as of March 8, 2016) monitoring schedule for the Polacca water system. Please note that the attached schedule does not reflect all the data that has been submitted to USEPA. There is still the lab report that was submitted that was incomplete. **Please have the water sampler look at the chain of custody from that sampling to see what was sampled (I think it was the Pesticides/SOCs from the East and West Wells, but do not quote me on that) before conducting the sampling.**

Some things to highlight on the attached monitoring schedule. Again, **double check with the last sampling events to confirm that certain contaminants have already been sampled in 2015:**

Asbestos – Asbestos needs to be collected from the (Lower) Polacca distribution system. This asbestos sample was due in 2014, so it is way overdue.

Disinfection By-Products – Samples are to be **collected only in August 2016** at the Polacca Circle Inn, Rose Namoki Residence, Ponsi Hall- Men's Restroom, and Walpi Elderly Center. These samples cannot be collected during any other month unless you request it and I approve it.

Nitrate – From both the East Well and the West Well. Even if there are results from 2015, please sample in 2016 since the sampling frequency is every year.

Arsenic – Quarterly from the East Well and the West Well

Inorganics – From the East Well and the West Well

SOCs/Pesticides – From the East Well and the West Well

Sodium – From the East Well and the West Well

VOCs – From the East Well and the West Well

Please contact me if you have any questions.
